**Additional Information / Prior Funding History:****Project Description/Justification:**

This harbor was transferred by the department to the City of Hoonah on August 10, 2005. The George Hall Harbor is the largest harbor in the City of Hoonah. After an electrical assessment in July 2011, the city was presented two major issues pertaining to the current electrical code and the electrical system's longevity and serviceability. Numerous electrical components are reaching or have reached their life expectancy and continued usage could reduce the reliability and safety of the facility. The city proposes to upgrade the electrical system to a more desirable condition by replacing the wiring and circuit breakers, the pedestals, the feeder cables, the grounding system, and the lighting system within the harbor and at the grid.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
