FY2010 FY2010 Federal Authorization for Statewide Automated Victim Information and Notification Programs Grant	Inc0TI	183.9	0.0	0.0	91.9	92.0	0.0	0.0	0.0	0	0	0

This request will increase the federal authority to meet the FY2010 grant amount.

The Department of Corrections (DOC) is requesting authority to receive and expend funding from the United States Department of Justice, Office of Justice Programs, Bureau of Justice Assistance's FFY2008 Developing and Enhancing Statewide Automated Victim Information and Notification (SAVIN) grant. The SAVIN grant assures victims of crime receive accurate and timely information regarding the status of offenders and events related to their case and enables victims participation in the process and the ability to make well-informed personal decisions.

As stated in both the Alaska Constitution and Statutes, a crime victim has the right to be reasonably protected from the accused and the right to obtain information about the accused, to include being informed of the accuser's escape or release from custody. In 1999, the State of Alaska, through the Department of Corrections, became one of the first states to initiate an automated victim notification system (VINES). This system provides self-registered victims with information regarding the custody status of a given offender.

The Department of Corrections will use this SAVIN grant award to enhance Alaska's existing statewide automated VINE system by adding photos which will allow for a more positive visual identification and verification of the offender. SAVIN also provides one more method to assure that a victim's rights to information and notification are being upheld.

With SAVIN funding it is anticipated that DOC will move closer to an environment of digital cameras and an industry standard interface capable of providing offender photos on the online victim notification system while also conversing with the offender management system (and possibly with other local and federal law enforcement agencies). This enhanced VINE system will be primarily evaluated based on its key objective of how well the program meets the needs of crime victims. At the end of the grant period DOC will produce a report that will measure results, along with the input from victims, to be included in a final report on the project provided to the Bureau of Justice Assistance.

Offender Habilitation Programs FY2006 Expand Sex Offenders Risk Assessment Project for Polygraph & Containment Model	Inc	500.0	150.0	0.0	350.0	0.0	0.0	0.0	0.0	2	0	0

Implementation of the "Containment Model" (which includes the use of polygraph examination) to enhance the Department's supervision of sex offenders releasing into Alaska communities.

Expand the sex offender risk assessment project in order to complete annual risk assessments on all releasing sex offenders (estimate 90-130 offenders per year); and to develop, implement, coordinate, and supervise the Sex Offender Containment Model (including polygraph examination) pilot project.

Alaska consistently has one of the highest per capita ratesof sexual assault in the United States. Sex offenders represent an average of 25% of the total incarcerated population in the U.S., and represent about 25-30% of Alaska's incarcerated population. Consensus among sex offender treatment providers and other experts in the field is that there is no "cure" for sexual offending behavior, but that many sex offenders can learn interventions to control their deviant behavior. Most sex offender specialized supervision and community treatment programs are designed to provide external support and controls. The goal of sex offender treatment and specialized supervision is to enhance public protection.

The sex offender-specific Containment Model provides for an individualized case management system that includes three elements: 1) sex offender-specific treatment; 2) supervision and monitoring that exerts external controls over the offender; and 3) polygraph examination to obtain a history and to monitor the offender's deviant fantasies and external behaviors. Currently, there are 38 states in the U.S. that use the polygraph examination as a sex offender management and supervisory tool. According to the Colorado Department of Corrections, results of the first polygraph examination revealed on average for each sex offender: 163 additional victims and 504 additional offenses. This represents new information which is not contained in the offender's criminal justice records, and without polygraph testing and treatment, would remain unknown.

It is critical that Alaska initiate specialized management and supervision of sex offenders, including caseload caps for sex offender probation officers and the use of polygraph examination in order to adhere to best practices in the field of sex offender management and supervision. In FY2006, the Containment Model initiative will begin in Southcentral Alaska as a pilot project with the plan to develop the program to expand statewide over the next four years. The overall philosophy and goal of the Containment Model is to enhance community and victim safety.

The potential impact on the department and possibly other agencies is that Alaska may experience an increase in the workload of probation officers, treatment providers, law enforcement personnel and the entire criminal justice system. Because the polygraph examination, combined with intensive supervision and sex offender treatment often reveals additional information and dangerous behaviors that otherwise may go undetected. An increase in violations and/or revocations may occur, but deviant behavior will be identified, potential crimes prevented and future victims protected from offenders.

Population Management (continued) Inmate Transportation (continued)

FY2012 AMD: Unanticipated 24-Hour Institution Support Costs (continued)

24-Hour Institutions' Personal Services Shortfall \$3,274.0:

This request will assist the department in maintaining specified inmate/staffing ratios, so as the inmate population swells beyond budgeted estimates or correctional officer position vacancies or leave occurs, the department must rely on working correctional officer overtime to maintain security. In FY2010, an average of 22 vacant correctional officer positions and an average daily inmate population of 3,753 resulted in a need for a man-hour equivalent of 33 PFT's to provide this coverage. During the first two quarters of FY2011 an average of 28 vacant correctional officer positions and an average daily inmate population of 3,826, resulting in a projected PFT equivalent for the fiscal year of 53 PFTs, translating into a shortfall of \$3,275.0 in premium pay for FY2011. The department continues in its efforts to maintain fully staffed facilities, with the intent to reduce the FY2012 PFT equivalent to the FY2010 numbers.

Reducing the budgeted, unfunded personal services "vacancy factor" to zero to fully fund all positions within 24-hour correctional institutions assists the department to 1) ensure security posts are staffed at all times, and 2) provide sufficient staffing levels to meet required relief factors. It is most cost effective to fill all positions and operate using a minimum of overtime coverage, while continuing to meet required inmate/staffing ratios and not compromise staff or public safety.

Authorization is being distributed as follows:

\$37.9 -- Transportation Unit; \$770.5 -- Anchorage Correctional Center; \$171.1 -- Anvil Mountain Correctional Center; \$308.6 -- Hiland Mountain Correctional Center; \$243.6 -- Fairbanks Correctional Center; \$99.7 -- Ketchikan Correctional Center; \$256.1 -- Lemon Creek Correctional Center; \$101.4 -- Mat-Su Correctional Center; \$328.5 - Palmer Correctional Center; \$359.9 -- Spring Creek Correctional Center; \$347.2 -- Wildwood Correctional Center; \$175.4 -- Yukon-Kuskokwim Correctional Center; \$74.1 - Pt. MacKenzie Farm

24-Hour Institutions' Commodities Shortfall \$230.4:

The department is requesting an increase to support higher operating costs in correctional centers directly resulting from the increasing in-state offender population, the elevated cost of goods and services as well as increased fuel surcharges on commodities purchased. The 24-hour facilities received an increase to the base budget in FY2008 with average daily populations at that time of 3,707. However the offender in-state population now exceeds a daily average of 3,826, creating a continued shortfall within the facilities. These shortfalls have previously been met by utilizing available personal services authorization or through the supplemental process. Personal services authorization is no longer available within the facilities to support non-personal services operating costs.

Commodities include household/institutional items such as inmate food, clothing and uniforms, bedding, institutional cleaning supplies, household non-food supplies, etc.

Authorization is being distributed as follows:

\$52.0 -- Anchorage Correctional Center; \$ 7.8 -- Anvil Mountain Correctional Center; \$24.6 -- Hiland Mountain Correctional Center; \$15.8 -- Fairbanks Correctional Center; \$3.5 -- Ketchikan Correctional Center; \$13.9 -- Lemon Creek Correctional Center; \$6.2 -- Mat-Su Correctional Center; \$31.3 - Palmer Correctional Center; \$34.0

FY2009 Eliminate Vacancy and Turnover Underfunding within 24 Hour Facilities	Inc	475.5	475.5	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

The Department of Corrections is responsible to local communities, staff and inmates to ensure staffing levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement.

The elimination of the vacancy and turnover rates within 24-hour correctional facilities will help assist the department to 1) ensure security posts are staffed at all times, and 2) providing sufficient staffing levels reflecting the number of FTEs needed to meet specified relief factors.

The efficient and effective application of staff resources is an integral part of accomplishing this goal. It is crucial to fill positions and alleviate the need for excessive overtime hours while continuing to maintain appropriate staffing levels without compromising staff or public safety.

This request, in conjunction with the request to redistribute authorization for Correctional Officer premium pay, should allow institutions to reduce excessive overtime by maintaining staffing levels.

The Department of Corrections is responsible to local communities, staff and inmates to ensure staffing levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement. This includes operating 12 in-state institutional facilities statewide which houses male and female, sentenced and un-sentenced adult felons and misdemeanants. The maximum daily in-state capacity is 3,778. However, the department continues to experience average daily populations exceeding this amount. The average daily population through December 31, 2010 was 3,826, with projected offender population anticipated to continue to increase through the remainder of the fiscal year and through FY2012. This population level continues to generate a shortfall within the 24-hour facilities, creating deficits within the personal services and commodities lines of the in-state institutions.

24-Hour Institutions' Personal Services Shortfall \$3,274.0:

This request will assist the department in maintaining specified inmate/staffing ratios, so as the inmate population swells beyond budgeted estimates or correctional officer position vacancies or leave occurs, the department must rely on working correctional officer overtime to maintain security. In FY2010, an average of 22 vacant correctional officer positions and an average daily inmate population of 3,753 resulted in a need for a man-hour equivalent of 33 PFT's to provide this coverage. During the first two quarters of FY2011 an average of 28 vacant correctional officer positions and an average daily inmate population of 3,826, resulting in a projected PFT equivalent for the fiscal year of 53 PFTs, translating into a shortfall of \$3,275.0 in premium pay for FY2011. The department continues in its efforts to maintain fully staffed facilities, with the intent to reduce the FY2012 PFT equivalent to the FY2010 numbers.

FY2012 AMD: Unanticipated 24-Hour Institution

Costs (continued)

Reducing the budgeted, unfunded personal services "vacancy factor" to zero to fully fund all positions within 24-hour correctional institutions assists the department to 1) ensure security posts are staffed at all times, and 2) provide sufficient staffing levels to meet required relief factors. It is most cost effective to fill all positions and operate using a minimum of overtime coverage, while continuing to meet required inmate/staffing ratios and not compromise staff or public safety.

Authorization is being distributed as follows:

\$37.9 -- Transportation Unit; \$770.5 -- Anchorage Correctional Center; \$171.1 -- Anvil Mountain Correctional Center; \$308.6 -- Hiland Mountain Correctional Center; \$243.6 -- Fairbanks Correctional Center; \$99.7 -- Ketchikan Correctional Center; \$256.1 -- Lemon Creek Correctional Center; \$101.4 -- Mat-Su Correctional Center; \$328.5 - Palmer Correctional Center; \$359.9 -- Spring Creek Correctional Center; \$347.2 -- Wildwood Correctional Center; \$175.4 -- Yukon-Kuskokwim Correctional Center; \$74.1 - Pt. MacKenzie Farm

24-Hour Institutions' Commodities Shortfall \$230.4:

The department is requesting an increase to support higher operating costs in correctional centers directly resulting from the increasing in-state offender population, the elevated cost of goods and services as well as increased fuel surcharges on commodities purchased. The 24-hour facilities received an increase to the base budget in FY2008 with average daily populations at that time of 3,707. However the offender in-state population now exceeds a daily average of 3,826, creating a continued shortfall within the facilities. These shortfalls have previously been met by utilizing available personal services authorization or through the supplemental process. Personal services authorization is no longer available within the facilities to support non-personal services operating costs.

Commodities include household/institutional items such as inmate food, clothing and uniforms, bedding, institutional cleaning supplies, household non-food supplies, etc.

Authorization is being distributed as follows:

\$52.0 -- Anchorage Correctional Center; \$ 7.8 -- Anvil Mountain Correctional Center; \$24.6 -- Hiland Mountain Correctional Center; \$15.8 -- Fairbanks Correctional Center; \$3.5 -- Ketchikan Correctional Center; \$13.9 -- Lemon Creek Correctional Center; \$6.2 -- Mat-Su Correctional Center; \$31.3 - Palmer Correctional Center; \$34.0 -- Spring Creek Correctional Center; \$25.1 -- Wildwood Correctional Center; \$ 8.4 -- Yukon-Kuskokwim Correctional Center; \$7.8 - Pt. MacKenzie Farm

This amendment provides FY2012 funding based on an FY2011 supplemental request.

FY2012 AMD: Unanticipated 24-Hour Institution Costs The Department of Corrections is responsible to local comm					0.0	15.8	0.0	0.0	0.0	0	0	0

The Department of Corrections is responsible to local confindings, stall and immates to ensure stalling levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement. This includes operating 12 in-state institutional facilities statewide which houses male and female, sentenced and un-sentenced adult felons and misdemeanants. The maximum daily in-state capacity is 3,778. However, the department continues to experience average daily populations exceeding this amount. The average daily population through December 31, 2010 was 3,826, with projected offender population anticipated to continue to increase through the remainder of the fiscal year and through FY2012. This population level continues to generate a shortfall within the 24-hour facilities, creating deficits within the personal services and commodities lines of the in-state institutions.

24-Hour Institutions' Personal Services Shortfall \$3,274.0:

This request will assist the department in maintaining specified inmate/staffing ratios, so as the inmate population swells beyond budgeted estimates or correctional officer position vacancies or leave occurs, the department must rely on working correctional officer overtime to maintain security. In FY2010, an average of 22 vacant correctional officer positions and an average daily inmate population of 3,753 resulted in a need for a man-hour equivalent of 33 PFT's to provide this coverage. During the first two quarters of FY2011 an average of 28 vacant correctional

Population Management (continued) Fairbanks Correctional Center (continued)

FY2012 AMD: Unanticipated 24-Hour Institution Costs (continued)

officer positions and an average daily inmate population of 3,826, resulting in a projected PFT equivalent for the fiscal year of 53 PFTs, translating into a shortfall of \$3,275.0 in premium pay for FY2011. The department continues in its efforts to maintain fully staffed facilities, with the intent to reduce the FY2012 PFT equivalent to the FY2010 numbers.

Reducing the budgeted, unfunded personal services "vacancy factor" to zero to fully fund all positions within 24-hour correctional institutions assists the department to 1) ensure security posts are staffed at all times, and 2) provide sufficient staffing levels to meet required relief factors. It is most cost effective to fill all positions and operate using a minimum of overtime coverage, while continuing to meet required inmate/staffing ratios and not compromise staff or public safety.

Authorization is being distributed as follows:

\$37.9 -- Transportation Unit; \$770.5 -- Anchorage Correctional Center; \$171.1 -- Anvil Mountain Correctional Center; \$308.6 -- Hiland Mountain Correctional Center; \$243.6 -- Fairbanks Correctional Center; \$99.7 -- Ketchikan Correctional Center; \$256.1 -- Lemon Creek Correctional Center; \$101.4 -- Mat-Su Correctional Center; \$328.5 - Palmer Correctional Center; \$359.9 -- Spring Creek Correctional Center; \$347.2 -- Wildwood Correctional Center; \$175.4 -- Yukon-Kuskokwim Correctional Center; \$74.1 - Pt. MacKenzie Farm

24-Hour Institutions' Commodities Shortfall \$230.4:

The department is requesting an increase to support higher operating costs in correctional centers directly resulting from the increasing in-state offender population, the elevated cost of goods and services as well as increased fuel surcharges on commodities purchased. The 24-hour facilities received an increase to the base budget in FY2008 with average daily populations at that time of 3,707. However the offender in-state population now exceeds a daily average of 3,826, creating a continued shortfall within the facilities. These shortfalls have previously been met by utilizing available personal services authorization or through the supplemental process. Personal services authorization is no longer available within the facilities to support non-personal services operating costs.

Commodities include household/institutional items such as inmate food, clothing and uniforms, bedding, institutional cleaning supplies, household non-food supplies, etc.

Authorization is being distributed as follows:

\$52.0 -- Anchorage Correctional Center; \$ 7.8 -- Anvil Mountain Correctional Center; \$24.6 -- Hiland Mountain Correctional Center; \$15.8 -- Fairbanks Correctional Center; \$3.5 -- Ketchikan Correctional Center; \$13.9 -- Lemon Creek Correctional Center; \$6.2 -- Mat-Su Correctional Center; \$31.3 - Palmer Correctional Center; \$34.0 -- Spring Creek Correctional Center; \$25.1 -- Wildwood Correctional Center; \$ 8.4 -- Yukon-Kuskokwim Correctional Center; \$7.8 - Pt. MacKenzie Farm

This amendment provides FY2012 funding based on an FY2011 supplemental request. 1004 Gen Fund (UGF) 259.4

Funding and positions are requested to begin the ramp-up of Goose Creek Correctional Center (GCCC) bringing the capacity to 1,019 by the end of FY2013. This represents 66% of the total hard beds filled (including the Special Management Unit and all segregation beds), 62% of staffing requirements, 50% contractual services, and 100% commodities to support the needs of this incarcerated population.

With the completion of GCCC, the Department of Corrections (DOC) is now faced with the challenges of opening this new facility. These challenges are anticipated to be significant and include: Phased recruitment and training of correctional officers, probation officers, medical staff, program staff, and support staff; securing and facilitating air transports transitioning inmates from Colorado to Alaska and ground transports for property transition; population management by classification will occur statewide in an effort to house offenders in the most suitable institution and geographic area.

The DOCs plans include beginning recruitment efforts with the planned transfer of existing employees and the appointment and training of new employees to meet the opening of the new facility. It is anticipated that recruitment and training efforts will continue through the third quarter, with efforts centered on full staffing and training needs being met by the end of the third quarter. This plan allows for sufficient staffing required to meet the anticipated phased opening.

The housing of offenders is planned to begin during the first quarter of FY2013. The department will begin housing of the Special Management Unit (SMU) and will continue to expand the offender population during the second quarter with the opening of the General Housing Module A. During the fourth quarter, the department anticipates initiating the transfer of inmates back to Alaska from the out of state contract facility located in Hudson, Colorado. During FY2013 it is planned to transition 635 offenders of the total out of state population back to Alaska with any remaining offenders being brought back during the first quarter of FY2014.

FY2009 Eliminate Vacancy and Turnover Underfunding within 24 Hour Facilities	Inc	135.7	135.7	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

The Department of Corrections is responsible to local communities, staff and inmates to ensure staffing levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement.

The elimination of the vacancy and turnover rates within 24-hour correctional facilities will help assist the department to 1) ensure security posts are staffed at all times, and 2) providing sufficient staffing levels reflecting the number of FTEs needed to meet specified relief factors.

The efficient and effective application of staff resources is an integral part of accomplishing this goal. It is crucial to fill positions and alleviate the need for excessive overtime hours while continuing to maintain appropriate staffing levels without compromising staff or public safety.

This request, in conjunction with the request to redistribute authorization for Correctional Officer premium pay, should allow institutions to reduce excessive overtime by maintaining staffing levels.

FY2012 AMD: Unanticipated 24-Hour Institution Costs IncM The Department of Corrections is responsible to local communities, staff and inmates to ensure staffing levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement. This includes operating 12 in-state institutional facilities statewide which houses male and female, sentenced and un-sentenced adult felons and misdemeanants. The maximum daily in-state capacity is 3,778. However, the department continues to experience average daily populations exceeding this amount. The average daily population through December 31, 2010 was 3,826, with projected offender population anticipated to continue to increase through the remainder of the fiscal year and through FY2012. This population level continues to generate a shortfall within the 24-hour facilities, creating deficits within the personal services and commodities lines of the in-state institutions.

107.6

24-Hour Institutions' Personal Services Shortfall \$3.274.0:

29.3

This request will assist the department in maintaining specified inmate/staffing ratios, so as the inmate population swells beyond budgeted estimates or correctional officer position vacancies or leave occurs, the department must rely on working correctional officer overtime to maintain security. In FY2010, an average of 22 vacant correctional officer positions and an average daily inmate population of 3,753 resulted in a need for a man-hour equivalent of 33 PFT's to provide this coverage. During the first two quarters of FY2011 an average of 28 vacant correctional officer positions and an average daily inmate population of 3,826, resulting in a projected PFT equivalent for the fiscal year of 53 PFTs, translating into a shortfall of \$3,275.0 in premium pay for FY2011. The department continues in its efforts to maintain fully staffed facilities, with the intent to reduce the FY2012 PFT equivalent to the

FY2010 numbers.

Reducing the budgeted, unfunded personal services "vacancy factor" to zero to fully fund all positions within 24-hour correctional institutions assists the department to 1) ensure security posts are staffed at all times, and 2) provide sufficient staffing levels to meet required relief factors. It is most cost effective to fill all positions and operate using a minimum of overtime coverage, while continuing to meet required inmate/staffing ratios and not compromise staff or public safety.

Authorization is being distributed as follows:

\$37.9 -- Transportation Unit; \$770.5 -- Anchorage Correctional Center; \$171.1 -- Anvil Mountain Correctional Center; \$243.6 -- Fairbanks Correctional Center; \$99.7 -- Ketchikan Correctional Center; \$256.1 -- Lemon Creek Correctional Center; \$101.4 -- Mat-Su Correctional Center; \$328.5 - Palmer Correctional Center; \$35.9 -- Spring Creek Correctional Center; \$347.2 -- Wildwood Correctional Center; \$175.4 -- Yukon-Kuskokwim Correctional Center; \$74.1 - Pt. MacKenzie Farm

24-Hour Institutions' Commodities Shortfall \$230.4:

The department is requesting an increase to support higher operating costs in correctional centers directly resulting from the increasing in-state offender population, the elevated cost of goods and services as well as increased fuel surcharges on commodities purchased. The 24-hour facilities received an increase to the base budget in FY2008 with average daily populations at that time of 3,707. However the offender in-state population now exceeds a daily average of 3,826, creating a continued shortfall within the facilities. These shortfalls have previously been met by utilizing available personal services authorization or through the supplemental process. Personal services authorization is no longer available within the facilities to support non-personal services operating costs.

Commodities include household/institutional items such as inmate food, clothing and uniforms, bedding, institutional cleaning supplies, household non-food supplies, etc.

Authorization is being distributed as follows:

\$52.0 -- Anchorage Correctional Center; \$ 7.8 -- Anvil Mountain Correctional Center; \$24.6 -- Hiland Mountain Correctional Center; \$15.8 -- Fairbanks Correctional Center; \$3.5 -- Ketchikan Correctional Center; \$13.9 -- Lemon Creek Correctional Center; \$6.2 -- Mat-Su Correctional Center; \$31.3 - Palmer Correctional Center; \$34.0 -- Spring Creek Correctional Center; \$25.1 -- Wildwood Correctional Center; \$ 8.4 -- Yukon-Kuskokwim Correctional Center; \$7.8 - Pt. MacKenzie Farm

This amendment provides FY2012 funding based on an FY2011 supplemental request.

Correctional Center (SCCC). During the FY2012 Management Plan reconciliation to personal services actuals, a set of net-zero transfers of this ACOA-related authority will appropriately spread funds throughout the facilities.

Ch. 13, SLA 2010, Sec. 5 appropriated \$10,462.6 to the Department of Corrections for implementation of the

Ch. 13, SLA 2010, Sec. 5 appropriated \$10,462.6 to the Department of Corrections for implementation of the interest arbitration decision dated March 19, 2009, establishing the monetary terms of the collective bargaining agreement with the ACOA. This multi-year appropriation was intended to meet the increased contract costs for both FY2010 and FY2011.

Original calculations of the increased personal service costs associated with the new ACOA contract terms identified \$3,335.0 as needed for FY2010 and \$7,127.6 needed for FY2011. This multi-year authorization was thus divided between the two years, and recorded and utilized. However, in both of the two years, the originally calculated amounts were not sufficient to meet the actual costs of the implemented contract.

The final FY2010 actual costs associated with the ACOA contract implementation were \$4,632.3, exceeding the applicable authority by \$1,297.3. The department was able to cover the extra FY2010 costs by utilizing existing lapse authority within the RDU, thus leaving the full FY2011 identified amount of \$7,127.6 available to be carried forward to meet the second year ACOA contract costs.

After reconciliation of the FY2011 personal services and adjustments for merit increases, transfers, separations, new hires, etc., actual costs associated with the ACOA positions continue to exceed the available authorization. The identified shortfall amount for this fiscal year was \$439.4 or the approximate equivalent of 5 Correctional Officer I/II positions (or one post) within the Anchorage area. Since FY2011 Management Plan was the basis used for calculating FY2012 bargaining unit personal service cost increases, the FY2012 Governor's Request is likewise short by \$439.4, resulting in a need for this amended budget request.

The Department of Corrections is responsible for public protection by providing safe and secure confinement of offenders. This includes operating 12 in-state institutional facilities statewide which houses male and female, sentenced and un-sentenced adult felons and misdemeanants. The average daily population through December 31, 2010 has been 3,826, exceeding the maximum daily capacity of 3,778. This has generated a shortfall within the 24-hour facilities, which are required to operate with specified inmate/security staff

The Department of Corrections is responsible to local communities, staff and inmates to ensure staffing levels in the correctional facilities are maintained to provide safety and security and to guarantee lawful conditions of confinement. This includes operating 12 in-state institutional facilities statewide which houses male and female, sentenced and un-sentenced adult felons and misdemeanants. The maximum daily in-state capacity is 3,778. However, the department continues to experience average daily populations exceeding this amount. The average daily population through December 31, 2010 was 3,826, with projected offender population anticipated to continue to increase through the remainder of the fiscal year and through FY2012. This population level continues to generate a shortfall within the 24-hour facilities, creating deficits within the personal services and commodities lines of the in-state institutions.

24-Hour Institutions' Personal Services Shortfall \$3,274.0:

This request will assist the department in maintaining specified inmate/staffing ratios, so as the inmate population swells beyond budgeted estimates or correctional officer position vacancies or leave occurs, the department must rely on working correctional officer overtime to maintain security. In FY2010, an average of 22 vacant correctional officer positions and an average daily inmate population of 3,753 resulted in a need for a man-hour equivalent of 33 PFT's to provide this coverage. During the first two quarters of FY2011 an average of 28 vacant correctional officer positions and an average daily inmate population of 3,826, resulting in a projected PFT equivalent for the fiscal year of 53 PFTs, translating into a shortfall of \$3,275.0 in premium pay for FY2011. The department continues in its efforts to maintain fully staffed facilities, with the intent to reduce the FY2012 PFT equivalent to the FY2010 numbers.

Population Management (continued) Wildwood Correctional Center (continued)

FY2012 AMD: Unanticipated 24-Hour Institution Costs (continued)

Reducing the budgeted, unfunded personal services "vacancy factor" to zero to fully fund all positions within 24-hour correctional institutions assists the department to 1) ensure security posts are staffed at all times, and 2) provide sufficient staffing levels to meet required relief factors. It is most cost effective to fill all positions and operate using a minimum of overtime coverage, while continuing to meet required inmate/staffing ratios and not compromise staff or public safety.

Authorization is being distributed as follows:

\$37.9 -- Transportation Unit; \$770.5 -- Anchorage Correctional Center; \$171.1 -- Anvil Mountain Correctional Center; \$308.6 -- Hiland Mountain Correctional Center; \$243.6 -- Fairbanks Correctional Center; \$99.7 -- Ketchikan Correctional Center; \$256.1 -- Lemon Creek Correctional Center; \$101.4 -- Mat-Su Correctional Center; \$328.5 - Palmer Correctional Center; \$359.9 -- Spring Creek Correctional Center; \$347.2 -- Wildwood Correctional Center; \$175.4 -- Yukon-Kuskokwim Correctional Center; \$74.1 - Pt. MacKenzie Farm

24-Hour Institutions' Commodities Shortfall \$230.4:

The department is requesting an increase to support higher operating costs in correctional centers directly resulting from the increasing in-state offender population, the elevated cost of goods and services as well as increased fuel surcharges on commodities purchased. The 24-hour facilities received an increase to the base budget in FY2008 with average daily populations at that time of 3,707. However the offender in-state population now exceeds a daily average of 3,826, creating a continued shortfall within the facilities. These shortfalls have previously been met by utilizing available personal services authorization or through the supplemental process. Personal services authorization is no longer available within the facilities to support non-personal services operating costs.

Commodities include household/institutional items such as inmate food, clothing and uniforms, bedding, institutional cleaning supplies, household non-food supplies, etc.

Authorization is being distributed as follows:

\$52.0 -- Anchorage Correctional Center; \$ 7.8 -- Anvil Mountain Correctional Center; \$24.6 -- Hiland Mountain Correctional Center; \$15.8 -- Fairbanks Correctional Center; \$3.5 -- Ketchikan Correctional Center; \$13.9 -- Lemon Creek Correctional Center; \$6.2 -- Mat-Su Correctional Center; \$31.3 - Palmer Correctional Center; \$34.0 -- Spring Creek Correctional Center; \$25.1 -- Wildwood Correctional Center; \$ 8.4 -- Yukon-Kuskokwim Correctional Center; \$7.8 - Pt. MacKenzie Farm

This amendment provides FY2012 funding based on an FY2011 supplemental request.

SB 218 relates to periodic polygraph testing of all sex offend	ers releasin	g on probation o	r parole supervisi	on. In								

With the addition of the polygraph examination being used as a tool with increased sex offenders in community sex offender treatment and on supervision, a corresponding increase in workload for the supervising officers will result. In the interest of public safety and because of the extreme danger sex offenders pose to the community, especially to children and vulnerable adults, and due to the increase in workload per sex offender, it is the intent of the Department to limit sex offender caseloads at 50 sex offenders per supervising officer.

FY2008 and FY2009, the Department will require two additional probation/parole officers each year to handle the

1004 Gen Fund (UGF) 282.2

increasing workload associated with managing sex offender specific caseloads.

Additionally, overall caseloads in these hub communities approximate 90-110 per probation officer, preventing these offenders from receiving the targeted supervision and structure that could assist them in successful rehabilitation and subsequent reintegration into their home communities. With very little probation officer oversight or targeted supervision, approximately 72% of parolees violate their probation and/or parole conditions within 6 months for technical violations such as failing to report, failure to complete rehabilitative programming or continued substance abuse. 1004 Gen Fund (UGF) 338.9 FY2013 Pilot Program for Domestic Violence Misdemeanant IncM 200.0 200.0 0.0 0.0 0.0 0.0 0.0 0.0 0.0	1007 IIA Nopis (Otilei) 200.0												
This increment provides funding for three dedicated full-time Adult Probation Officers in Anchorage, Fairbanks, & Bethel, aimed at providing targeted supervision and community reintegration for remote/furnal probationers and paroless who are actively supervised in these hub communities for felony domestic violence and/or sexual assault. These offenders are often released from Alaska's prisons with rehabilitative programming or supervision restrictions that require them to remain in Anchorage, Fairbanks or Bethel until programming is completed, instead of returning to their home communities. They are faced with attempting to find employment, housing, etc. in an unsupported environment, and placed on a lengthy waiting list for rehabilitative programming. Additionally, overall caseloads in these hub communities approximate 90-110 per probation officer, preventing these offenders from receiving the targeted supervision and structure that could assist them in successful rehabilitation and subsequent reintegration into their home communities. With very little probation officer oversight or targeted supervision, approximately 72% of parolees violate their probation and/or parole conditions within 6 months for technical violations such as failing to report, failure to complete rehabilitative programming or continued substance abuse. 1004 Gen Fund (UGF) 338.9 FY2013 Pilot Program for Domestic Violence Misdemeanant IncM 200.0 200.0 0.0 0.0 0.0 0.0 0.0 0.0 0.0	FY2013 Targeted Supervised Release of Domestic Violence	Inc	338.9	287.9	10.5	25.5	15.0	0.0	0.0	0.0	3	0	0

FY2013 AMD: Community Jails Funding	Inc	600.0	0.0	0.0	600.0	0.0	0.0	0.0	0.0	0	0	0

Additional funding is needed to cover costs for operating the 15 community jails that house state prisoners. In FY2012, the Department of Corrections (DOC) received financial reports from the communities and determined the original estimates were not sufficient. DOC allocated available FY2012 funding based on reported financial data and each community was funded at approximately 95.7% of their costs to operate. A supplemental was requested to fund remaining costs for FY2012.

DOC is currently analyzing financial data from the community jails and evaluating a methodology to adequately cover operational costs of the 15 community jails participating in the program. DOC anticipates updating the community jails funding allocation for FY2014 once the cost analysis is complete.

This FY2013 amendment will fund community jails at the same level as FY2012 plus the supplemental amount. FY2013 December Budget - \$7,603.4 FY2013 Amendments - \$600.0 TOTAL FY2013 - \$8,203.4

FY2013 Community Jails Allocation (including amendment): Bristol Bay Borough - \$172,701 Cordova - \$193,725

Additional funding is requested to fully pay contractors for housing offenders at Community Residential Centers (CRCs) for FY 2008. The Department of Corrections (DOC) has professional services contracts with CRC providers to help meet the security and residential needs of adult offenders in the State of Alaska.

Increased contract amounts are in part attributable to an added percentage based on the Consumer Price Index (CPI); a measure of the average change in the prices DOC is charged for these services. The department

Inmete Health Care (continued)												

Inmate Health Care (continued) Inmate Health Care (continued)

FY2010 Increase Mental Health Services (continued)

> The Department of Corrections (DOC) processes approximately 38,000 bookings annually. Nearly 14,000 of these bookings have a mental health diagnosis. Mental Health staff are providing services for approximately 100 - 120 new patients each month who had previously been unidentified as having mental health diagnosis. This funding will provide staffing to meet the increased offender population with mental health issues.

The Alaska Mental Health Trust Authority funded Hornby Zeller Study of "Trust Beneficiaries in the Alaska Department of Corrections" (December 2007), recommends revised screening and assessment protocols for mental health to capture a higher, more accurate portion of Alaska's mentally ill population upon incarceration. This improved reception and diagnostic tool will systemically identify moderate mental illness, brain injury, fetal alcohol spectrum disorder, and other brain disorders. Better identification will in-turn increase the number of incarcerated mentally ill offenders for referral to mental health treatment, substance abuse treatment, or other institutional programming; or, for diversion into expanded community-based services.

An increased number of offenders will generate the need for expanded treatment programs. This will require an increased number of DOC staff and increased professional services contracts for mental health providers for expanded institutional and/or community-based services. One primary area of focus begins while the offender is still incarcerated. DOC mental health care staff will link community treatment providers with the soon-to-be released offender so a plan can be developed for the offender to transition into treatment once released by DOC. One known existing DOC position that will be 50% funded by this request is the Mental Health Clinician II position assigned to the Yukon-Kuskokwim Correctional Center, this represents approx \$67.7. Coordinated clinical care between DOC and community mental health providers is critical to the success of re-entry.

The level of treatment services depends strictly on the multi-axial classification of the offender. For both incarcerated and released offenders this can range from intensive daily rehabilitation and treatment services with a staff/client ration 2:1 for high risk individuals, to weekly group therapy for low-risk individuals. These expanded contractual mental health services for intake and treatment may include day rehabilitation and treatment plans to address lifeskills, medication management and administration through direct observed therapy, thinking errors and anger management.

Expanded professional services contracts may include, but are not limited to: Norton Sound Health Corporation, Mat-Su Health Services, Daybreak Inc, Anchorage Community Mental Health Services, Seaview Community Services, Assets Inc, Fairbanks Community and Behavioral Health Services, South Central Foundation, and the Juneau Alliance for the Mentally III.

1171 PFD Crim (DGF) 444.8 FY2010 Establish an Institutional Sex Offender Treatment

200.0 0.0

200.0

0.0

0.0

0.0

0.0 0

This funding will increase the Sex Offender Treatment Program for institutional programming within the Wildwood Correctional Center, beginning with Level I (Basic) treatment programs. This will enhance community safety because more offenders will receive intensive assessment and treatment prior to release.

Inc

Services in the Level 1 program would include offense-specific assessment and psycho-educational programming on basic sexual offending issues. Offense-specific treatment will be offered in an individual and group setting and therapists will work with probation officers to develop appropriate safety plans for offenders who are releasing.

The Department of Corrections (DOC) has operated the Institutional Discharge Project Plus (IDP+) since 2002. The caseload for this clinician currently exceeds 85 statewide, far exceeding the national best-practice standards. This project uses a mental health clinician to link felony offenders with a psychotic disorder being released on probation or parole into community treatment programs statewide. The pre-release discharge planning can include an expedited Social Security application for individuals who qualify. In addition, the IDP+ mental health clinician works closely with probation officers to closely monitor court ordered conditions to enhance the individual's motivation and prospect for continued treatment and stability, and to promote public safety.

In 2007 Hornby, Zeller, & Associates studied a sample (n=125) of felons 1-year post-release from the IDP+ program. For those who participated and completed the IDP+ program, there was a 15% recidivism rate one year post-release compared to the 38% average for all other offenders.

This funding will expand the IDP+ program with one additional IDP+ mental health clinician to redistribute the caseload to the national best-practice standard, to expand clinical eligibility for the programs services (including high needs & high risk individuals that have bipolar disorder, mental retardation, Traumatic Brain Injury, Fetal Alcohol Spectrum Disorder or other serious cognitive impairments), to ensure individual success, reduce criminal recidivism, and to ensure increased public

FY2011 AMD: Meet Physical Health Care Funding Shortfalls Resulting from Increased Medical Costs	Inc	3,050.8	0.0	0.0	3,050.8	0.0	0.0	0.0	0.0	0	0	0

The Department of Corrections (DOC) is obligated to deliver essential medical care to incarcerated offenders. The department is requesting an increase to the base budget of \$3,050.8 for increased inmate health care costs that are directly related to the fees-for-services.

Medical costs continue to escalate for inmates, as for the whole nation. "Costs for the most popular types of health care coverage are projected to increase at double-digit rates through the remainder of 2009 and into 2010," according to a recent national survey of insurers and administrators conducted by Buck Consultants, an independent subsidiary of Affiliated Computer Services, Inc. "Health insurance premiums have consistently grown faster than inflation or workers' earning in recent years." (Kaiser Family Foundation, March 2009 newsletter)

A shortfall is projected in the in-state and out-of-state (inmates in Arizona and now Colorado) medical fees-for-service. The department is required to provide and pay for health care services for all offenders. The department is seeing an increase in chronic disease associated with diabetes, cancer, heart disease, health-related issues due to obesity, and health issues associated with care for geriatrics. Fees-for-service costs are generated when it is necessary to seek non-institutional medical treatment for an inmate. The types of non-institutional medical treatment may include dialysis treatment for renal failure and/or acute renal failure, chemotherapy and radiation, etc. The department promotes good relations with non-institutional health care providers by maintaining timely payments, abiding by contractual agreements, and avoiding incurring interest charges. Nonpayment could result in a lapse of medical services for inmates and ultimately increase the severity of health related issues. The department receives a discounted fee-for-service rate for contracted medical services, due to the high volume of need. Costs associated with catastrophic medical cases (defined as in excess of \$30.0 for a single event for an individual) unfortunately cannot either be accurately predicted or controlled.

In FY2009 a \$2,126.9 PFD Criminal Fund increment was approved within this component, in addition to an approved FY2009 supplemental request of \$646.4. A FY2010 supplemental request of \$4,650.1 has been introduced, so this FY2011 Governor's Amended request of \$3,050.8 is simply acknowledgment of the projected continued need.

The Department of Corrections (DOC) is obligated to d	alivar acceptial m	adiaal aara ta in	aaraaratad affand	0.40								

The Department of Corrections (DOC) is obligated to deliver essential medical care to incarcerated offenders within the 12 in-state institutions. This request will assist in meeting the costs of providing these required health care services.

Personal Services: \$1,291.8

The department must maintain medical staffing coverage for 12 in-state correctional facilities, some of which require 24/7 coverage. Because of numerous position vacancies in addition to absences of regular full-time staff stemming from worker's compensation, Family Medical Leave Act, military deployment, and staff vacation absences, it is necessary to pay overtime (premium pay) and the costs associated with unbudgeted on-call positions.

In addition to the challenges of maintaining adequate medical coverage, the Medical Segregation Unit at Anchorage Correctional Complex (ACC) has maintained a high census with high acuity patients, including a mental health patient who requires one-on-one care. When relief services are necessary, the order of coverage follows: 1) full-time Anchorage Central Office (ACO) relief nurse positions; 2) non-perm substitute nursing positions; 3) contracted nursing relief vendor (Maxim HealthCare Services); and, 4) authorized overtime of regular full-time staff. These multiple factors have generated costs in the personal services line beyond what is currently in the FY2012 Governor's Budget.

These costs have been historically met through the supplemental process.

Contractual Services: \$1,219.7

This request along with the FY2012 Governor's Budget of \$1,500.0 will increase the services line and meet an overall medical Consumer Price Index (CPI) of 7%.

The department continues to experience a shortfall in the in-state and out-of-state (inmates in Colorado) medical fees-for-service as well as hospital and nursing contracted services. The department is required to provide and pay for necessary health care services for all offenders. The department is seeing an increase in chronic disease associated with diabetes, cancer, heart disease, health-related issues due to obesity, and health issues associated with care for geriatrics. Fees-for-service are generated when it is necessary to seek non-institutional medical treatment for an inmate. The types of non-institutional medical treatment may include dialysis treatment for renal failure and/or acute renal failure, chemotherapy and radiation, surgery, chronic/long term care diseases, etc. Positive relations are promoted with non-institutional health care providers by maintaining timely payments, abiding by contractual agreements, and avoiding incurring interest charges. Nonpayment could result in a lapse of medical services for inmates and ultimately increase the severity of health related issues. The department receives a discounted fee-for-service rate for contracted medical services, due to the high volume of need. Costs associated with catastrophic medical cases unfortunately cannot either be accurately predicted or controlled. Known billings for the 69 catastrophic, fee-for-service cases received as of December 23, 2010 totaled \$4,048.0, or an average FY2011 monthly cost of \$736.0, but the actual catastrophic cases' cost to the department is

FY2013 Expanded Vocational Ed	lucation Support and Services	Inc	156.0	0.0	0.0	156.0	0.0	0.0	0.0	0.0	0	0	0

This request will expand vocational education services provided through the Department of Corrections (DOC) to incarcerated offenders under the department's custody.

Providing vocational education to immates increases their likelihood of employment following release. Meaningful employment leads to financial stability. This can be a turning-point for an ex-offender. Becoming financially stable and becoming a functional member of the community lessens the likelihood of their reoffending and returning to prison. Vocational programs have been implemented in seven of the in-state institutional facilities. This funding will provide continued and expanded support of existing programs such as:

Alaska Marine Safety Association (AMSEA) marine survival and drill conductor training: Trains the students to be emergency drill conductors on commercial fishing boats.

Animal care vocational certification: The animal behavior and obedience and grooming training is designed to provide instruction in skills to obtain animal grooming related employment opportunities when inmates are released from incarceration.

Confined space entry certification: Delivered by OSHA certified instructor and designed to train and certify individuals who work in confined spaces under the OSHA definition.

Flagger Certification: Allows an inmate to earn a four year certification after completing the flagger course and exam.

HAZWOPPER Certification: Emergency response training for general site workers engaged in hazardous substance cleaning-up operations. Each inmate will be certified as an individual who is OSHA certified.

Occupational Safety and Health Administration (OSHA) 10: 10 hour OSHA safety certification.

Small engine repair: A 50 hour, two and four cycle, small engine repair class offering classroom and hands on training.

Surface New Miner Certification: Delivered by Mine Safety and Health Administration (MSHA) approved cooperative instructors, provides instruction designed to train and certify person who work in a Part 48 surface

mine.

The Department of Corrections (DOC) seeks to expand the residential sex offender treatment program currently in place at the Lemon Creek Correctional Center (LCCC) in Juneau to the MatSu area (3rd Judicial District) which would implement a therapeutic residential sex offender treatment program for approximately 30 offenders. The DOC currently incarcerates over 600 convicted sex offenders at any given time during the year, however, the only opportunity for sex offender treatment while incarcerated is the 29 beds at LCCC. Due to current DOC treatment capacity, the great majority of these 600 convicted sex offenders will be released with no tools or skills to avoid a possible re-offense. This shortage will result in more untreated sex offenders releasing into the community placing the general public at a higher risk for re-offense.

Results of the program will be measured through data collection on those who successfully complete the program
