	It is the intent of the legislature that the Department of Community and Economic Development administer capital matching grants to Alaska organizations committed to building new addiction treatment facilities throughout the state. These grants will match local and private contributions to the maximum extent possible while increasing the number of available addiction treatment slots in the nine regions identified by the DHSS 1115 waiver application. The matching grants are conditional on the recipients providing at least a commensurate level of match funding.								X

	<b>Response</b>													
	It is the intent of the legislature that the Department of Environmental Conservation collect data on as many per- and polyfluoroalkyl substances (PFAS) as possible, even if that data is not being presently analyzed, to build a baseline of data that will be necessary for understanding the amount of PFAS contamination in soil and water across the state, to estimate the cost of clean up, and to develop a long-term plan of action. The substances for which data should be collected include perfluorooctanesulfonic acid (PFOS), perfluorooctanoic acid (PFOA), perfluoroheptanoic acid (PFHpA), perfluorohexane sulfonic acid (PFHxS), perfluorononanoic acid (PFNA), perfluorobutane sulfonate (PFBS), and the 12 other compounds listed in the Environmental Protection Agency (EPA) method 537.1 testing panel, revised November 2018. It is the intent of the legislature that the commissioner of environmental conservation notify the legislature if the department has identified substances other than those listed above that will be tested, and, if not, the reasons why the department has chosen to limit the data collected, including cost, scientific understanding, or lack of evidence that those chemicals are found in the soil and water in the state.
